Global-i (Gi) Launches Gi ReStrat[®] Suite of Research and Strategy Services, April 29, 2008

Stone Ridge, VA (April 29, 2008) - Global-i (www.globaliconsulting.com), a provider of strategic business and technology consulting and project-based outsourcing services to the converged communications industry, announced today that it is launching its Global-i ReStrat[®] Suite of research and strategy services.

The company will now offer Global-i ReStrat[®] Service to Service Providers, OEMs, Enterprise and Vertical Market Customers, in order for them to quickly jump start their Communications/IT Service Conceptualization efforts to justify a Full-Scale Product/Service Creation and Infrastructure Implementation initiative.

Global-i ReStrat[®] Service benefits by creating a highly effective decision-making assessment in the framework of key ecosystem elements. Another benefit is development of a powerful and innovative strategy based on in-house research, baseline data analysis and stakeholder interviews. Investment Justification is an added benefit that builds on the highest ROI justification fitting the strategy. Program Requirements are generated by delivering a set of critical high-level requirements. Finally, a recommendation is presented for detailed Proof-of-Concept (if need be) and full-scale implementation.

In a typical scenario, an enterprise client wanting to upgrade to a next-generation communications infrastructure would benefit from Global-i ReStrat[®] Service by quickly and effectively having their proof of concept assessed, converged communications/IT strategy validated, preliminary investment justification derived and high-level infrastructure requirements generated.

Global-i ReStrat[®] Service is available in three integrated service packages. The all inclusive package called Global-i ReStrat[®] DecisionInSight Service includes all components allowing clients to utilize this service as a comprehensive decision tool prior to launching full-scale development and implementation. The strategy focused package called Global-i ReStrat[®] StrategyInSight Service includes components allowing clients to utilize this service as a strategy tool in preparation for launching a detailed POC. The assessment focused package called Global-i ReStrat[®] AssessmentInSight Service includes components allowing clients to utilize this service as an assessment tool in preparation for launching a detailed POC. Packaging of this service in three flavors offers flexibility to clients wanting to evolve their next-generation communication infrastructure planning and subsequent implementation in a structured and expeditious manner. In addition, Global-i has developed

Global-i

Critical Performance Achieved

this service in the framework of its overall service portfolio, where upon the client concluding this service can evolve into Global-i's comprehensive follow-up services for full lifecycle development and infrastructure implementation.

As an Outsourced Service, Global-i delivers the full-research and strategy based services by integrating Global-i consultants in the client's existing teams and/or creates dedicated teams at the client project location(s). As an in-house-based Consulting Service, Global-i also delivers the full-research and strategy based services as a turnkey service from its delivery center. In either case, the Global-i ReStrat® experts are trained in the Global-i ReStrat® Methodologies.

Further information on these services please call our office at 703-574-2917 or send an email to restratinfo@globaliconsulting.com.
